

COURSEPLAY EDITOR

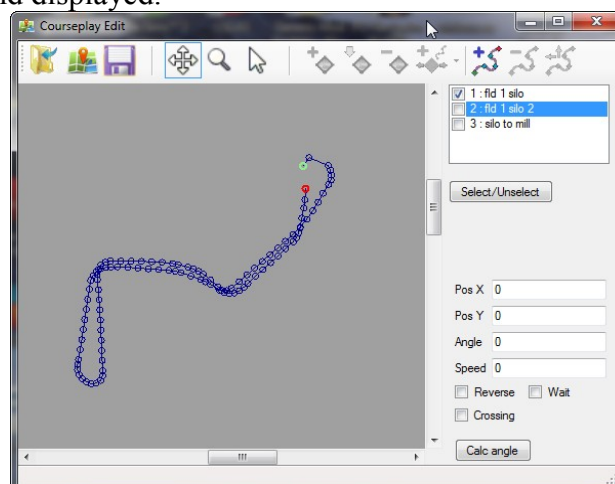

USER INTERFACE

OPEN COURSEPLAY (XML)

Click on „Open“ button and select „courseplay.xml“ file. File is located in savegame folder.
(eg. %Documents%/My games/FarmingSimulator2011/savegame1/courseplay.xml)
Courses will be loaded and displayed.

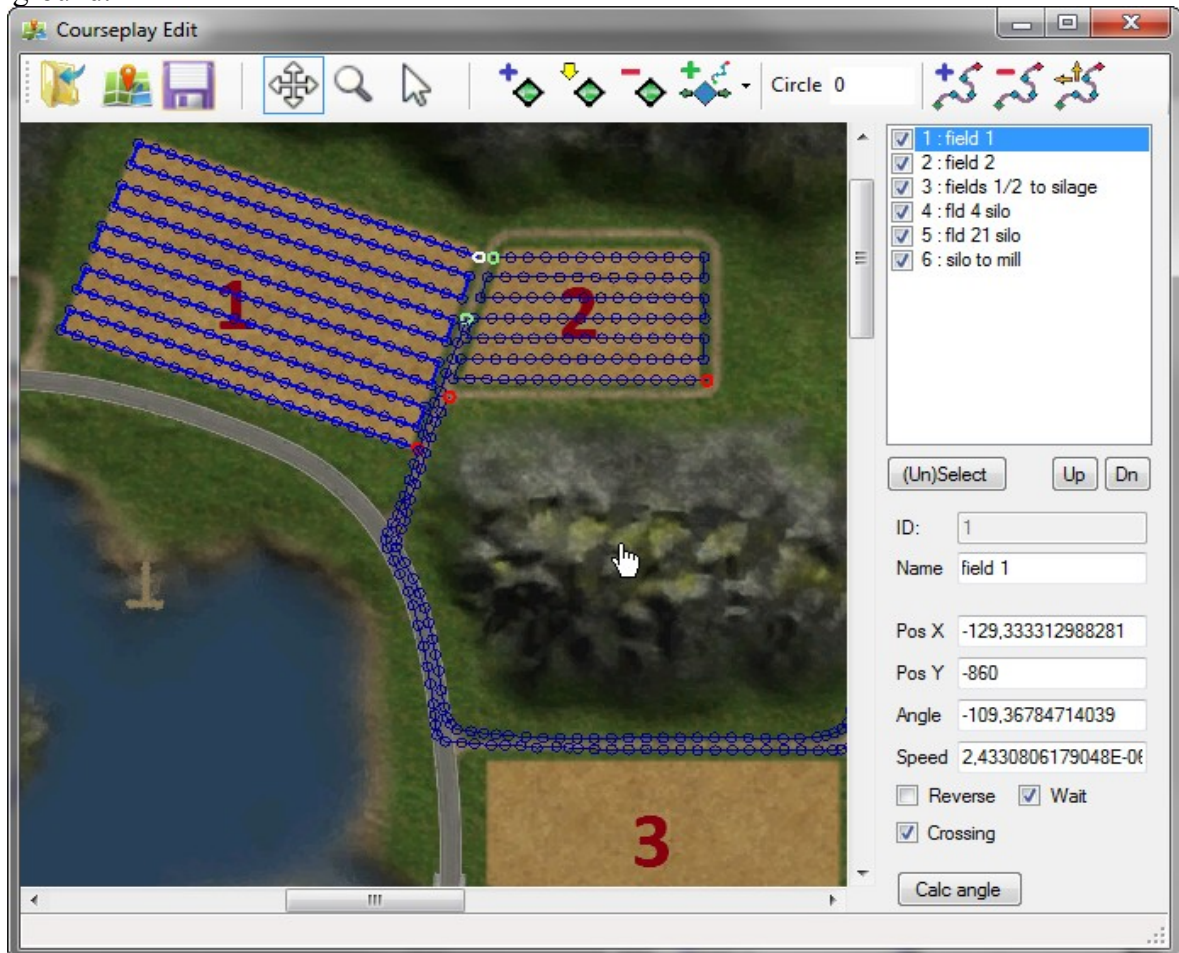

OPEN MAP BACKGROUND IMAGE

For better orientation you can open PDA map image as background. First you have to save image as bitmap. Image is located in „map01“ folder of map you use (or in map zip for mod...). Open file „pda_map.dds“ and save it as bitmap.

In Courseplay editor then open bitmap by clicking on „Map“ button. Image will be used as background.

MOVE MAP, ZOOM, SELECT WAYPOINTS

To move map use „Move“ button. By click&drag you can move map.

To zoom use „Zoom“ button. Click left mouse button to zoom in, right mouse button to zoom out, middle mouse button to reset to 1:1.

To select waypoint use „Select“ button. By dragging you can move waypoint.

WAYPOINT OPERATIONS

Before you can do anything with waypoints, some waypoint (and course) have to be selected.

Type of waypoint is displayed by color – green = start, dark blue = normal, blue = waitpoint, yellow = crossing, pink = reverse, white = selected, red = end.

Add button – append waypoint to course

Insert button – insert waypoint BEFORE selected waypoint

Delete button – delete selected waypoint

Fill button – create waypoints between selected and previous waypoint

Fill button example

HELP CIRCLE

Circle

For better placing you can display circle around selected node. Fill number to textbox and select node. Circle around selected node will be displayed.

Green circle with diameter entered to textbox, red with double diameter.

COURSE OPERATIONS

Create new course – click button and then clic on map. New course with two waypoints will be created.

Delete course – selected course will be deleted

Recalc directions – directions (angles) in all waypoints in selected course will be recalculated (experimental, aprox.values)

LIST OF COURSES

<input checked="" type="checkbox"/>	1 : field 1
<input checked="" type="checkbox"/>	2 : field 2
<input checked="" type="checkbox"/>	3 : fields 1/2 to silage
<input checked="" type="checkbox"/>	4 : fld 4 silo
<input checked="" type="checkbox"/>	5 : fld 21 silo
<input checked="" type="checkbox"/>	6 : silo to mill

(Un)Select Up Dn

Only checked courses are displayed. With button „Select/Unselect“ you can select/unselect all courses.

(Un)Select button for select or unselect all courses.

Up / Dn buttons for move course up or down in list.

INFO SECTION

ID: 4

Name: course 4

Pos X: 600

Pos Y: -681,600006103516

Angle: 0

Speed: 0

☐ Reverse ☐ Wait

☐ Crossing

Calc angle

Here you can manually edit values of course and waypoints...

OTHER NOTES

Tired of re-recording courses I made this tool for visually editing courseplay XML. If you want to use it, use it at your own risk.

I don't plan make any updates or add new features, port it to other OS...

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.

Runs on Win 7 with MS .NET Framework 4.

Other systems not tested.
